Şanlıurfa is the biggest producer of livestock in the Southeastern Anatolia region. It is appealing for animal husbandry investments in terms of affordable day-to-day care and fodder costs. Atatürk Dam Lake and the Euphrates River provide many opportunities for aquaculture investments. Along with new and increasing animal husbandry investments, Şanlıurfa is taking sure steps towards becoming the production center for Meat, Dairy and Aquaculture Products in our country.

A consequence of the completed irrigation projects of GAP, the rapidly rising agricultural product quantity in Şanlıurfa has resulted in the quick development of Agriculture-Based Food Industry Sector. Şanlıurfa is becoming an important hub for Agriculture-Based Food Industry as the sector continues to benefit from grants and the Incentive System.

NUMBER OF FARMERS

*The number of farmers registered to the Farmer Registration System (ÇKS) is approximately 58.852
Our province is home to 2.1% of all registered farmers in Turkey.*

ORGANIC AGRICULTURE

Şanlıurfa offers the best conditions for organic agricultural farming available in Turkey, with more and more wide wilderness areas becoming irrigable. As existing organic agriculture practices in the province rapidly grow in number, Şanlıurfa is taking firm steps towards becoming the organic agriculture center of our country.

- 23 products (Barley, Pistachios, Pepper, Almond, Wheat, Garbanzo Beans, Soy, Lentils, Corn, Mint, Pomegranate, Cumin, Corn Silage, Tarragon, Paddy, Apple, Safflower, Lemon Grass, Melon, Cotton and Olive etc.) are organically produced in Şanlıurfa, on 89,330 decares of land. The total production is 41,530 tons.

- Organic products are purchased by the establishments from neighboring provinces. Factories of 15 commercial businesses (Cotton gin, Olives etc.) in our province purchase and process the organic products.

- The production area and total quantity of organic agriculture products have been listed in the table shown, with the exception of data from the transitional period.

Production Area and Quantity of Organic Agriculture Products

PRODUCT	PRODUCTION AREA (Decare)	PRODUCTION QUANTITY (Tons)
Cotton	25,085	14,924
Wheat	23,387	12,796

TOTAL	89,330	41,530

Şanlıurfa Directorate of Provincial Agriculture and Forestry (2017)

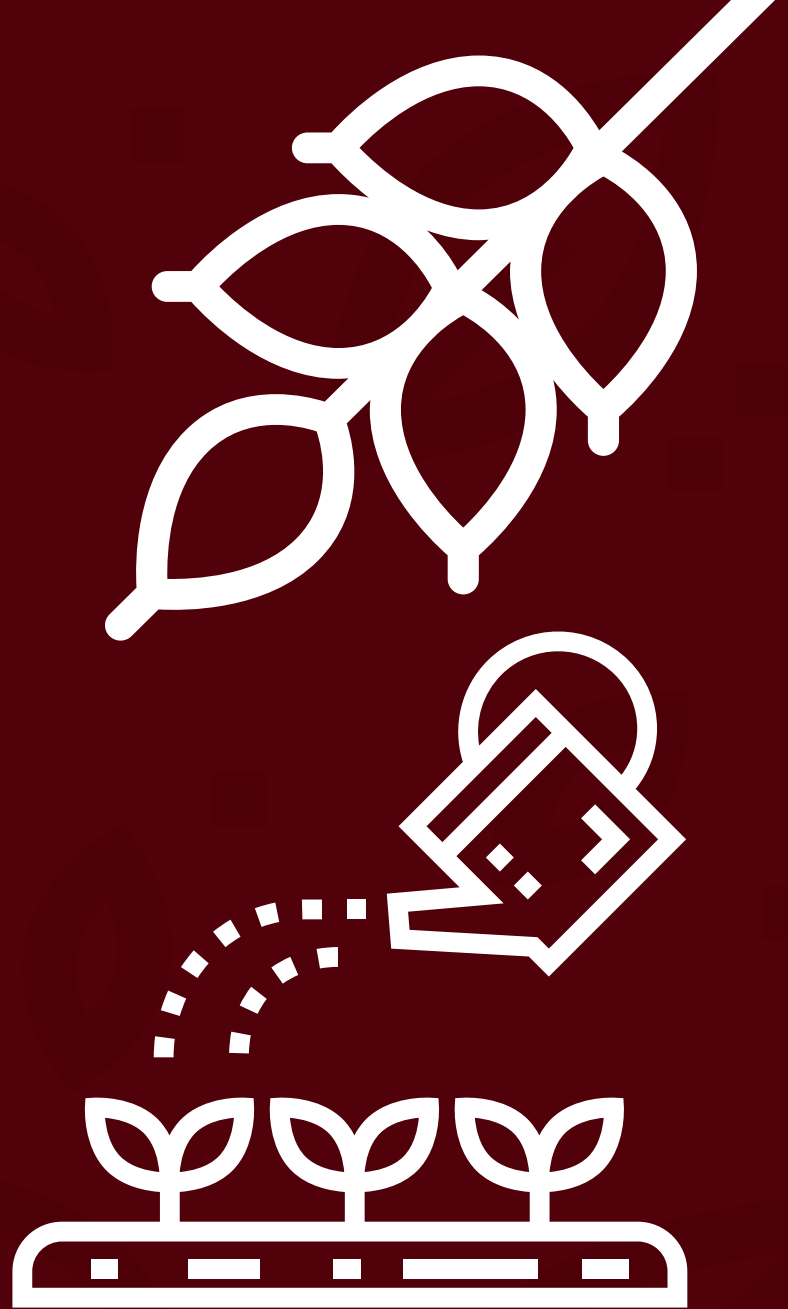

GREENHOUSE FARMING

Considered to be the heart of the Southeastern Anatolia Project, Şanlıurfa possesses many important advantages and a high potential for greenhouse farming by virtue of its suitable climate, fertile land, high sunlight duration, low humidity rate and geothermal water sources.

Greenhouse farming has quickly spread in the province, particularly after the discovery of a geothermal water well in Karaali District in 2000, and the area of 31 greenhouses in the region now approach 500 decares.

The total area in the province that is used for greenhouse farming is approximately 700 decares. Additionally, there are 103 greenhouses and 86 related businesses in the province.

Products produced hydroponically in state-of-the-art greenhouses are then exported to many different European countries, including Russia and Germany. The area allocated for greenhouse farming is predicted to rise to **10 thousand** decares by **2023** with the establishment of 16 new geothermal water wells.

Şanlıurfa Directorate of Provincial Agriculture and Forestry (2017)

10 REASONS TO INVEST IN ŞANLIURFA

1. Has a young and dynamic population. (54% of the population is between the ages of 15-65.)
2. Is located on the historic Silk Road and close to the Middle Eastern market.
3. Possesses an important potential with regards to agricultural production. (The biggest producer of cotton and lentils, and the second biggest producer of pistachios in Turkey.)
4. Has advantages in export thanks to its proximity to border gates and harbors and the presence of international cargo airport (The Railway Project, planned to connect Organized Industrial Sites to harbors and national main line is underway.)
5. Located right at the heart of GAP, Şanlıurfa can utilize the resources of the project, which is one of the rare large-scale regional development plans in the world.
6. Much of its agricultural lands are irrigable.
7. Has land suitable for organic agriculture (Biggest producer of organic cotton in Turkey).
8. Rich in renewable energy resources.
9. Suitable for greenhouse farming by virtue of having geothermal resources and high sunlight duration.
10. Can fully benefit from Regional Incentives and Grants as a developing province.

SUITABLE SECTORS IN ŞANLIURFA FOR INVESTMENTS IN AGRICULTURE AND AGRICULTURE-BASED INDUSTRIES

- Cotton Processing
- Processed and Frozen Food Packaging
- Wool Production
- Fruit-Vegetable Production and Processing Facilities
- Dairy and Meat Processing
- Wool Production
- Fishery and Fish Processing Facilities
- Greenhouse Farming
- Animal Husbandry (Livestock and Milk Production)
- Pasta and Semolina Production
- Forage Crops Production
- Pistachio Processing Facility

INCENTIVES AND SUBSIDIES

INVESTMENT INCENTIVES

Implementing Agency: Ministry of Economy, General Directorate of Incentive Implementation and Foreign Investment

Related Regulations

- "Legislation Regarding Government Incentives for Investments", published in The Official Gazette of Turkey № 28328, dated 19.06.2012
- "Communique on the Implementation of the Legislation Regarding Government Incentives in Investments (Communique №: 2012/1)" published in The Official Gazette of Turkey № 28329, dated 20.06.2012

Fixed Investment Rate and Minimum Capacity

- The fixed investment rate required for investments to qualify for incentives is:

Five hundred thousand Turkish Liras. Investments must also fulfill the requirements regarding minimum capacity, fixed investment rate and other terms.

Application Authority

- Applications for Incentive Certificates must be made to the Ministry of Economy. However, investors can also choose to apply from the local units (Chamber of Industry, Development Agencies) for the investments to be determined by communique if the investment is within the scope of general incentive implementations, and its fixed investment amount does not exceed ten million Turkish Liras.

Incentive Certificate

- In order for an investment to benefit from incentive practices, the project must first be approved and an incentive certificate must be drawn up.

Benefiting from Other Incentives

- Investment expenditures benefiting from the incentives within the scope of these legislations cannot also benefit from the incentives provided by other state institutions and organizations. However, investments that are only benefiting from the subsidized loan incentives of other state institutions and organizations can also benefit from incentive elements in the scope of this legislation, with the exception of interest incentives.

Assessment of the Agricultural Sector

- Investments in the agricultural sector can benefit from the "General Incentive System" and "Regional Incentives". Şanlıurfa is located in the 6th Region as dictated by the New Incentive System, which is the region whose investments most benefited from incentives thanks to the scale of the incentivized sectors, the decrease of labor costs and the development of financing opportunities.

Investment Topics Unable to be Incentivized

- Flour, semolina (excluding semolina investments integrated with pasta manufacturing and corn semolina investments), fodder (excluding fish meal, fish oil,
- fish fodder and fodder production in integrated animal husbandry), starch and starch based sugar. (excluding investments in crystalline fructose production exclusively from starch milk).
- Catering businesses (ready-to-serve).
- Sugar cubes.
- Greenhouse farming investments below 5 decares.
- Plant production (except greenhouse farming investments above 5 decares, mushroom cultivation, and fodder plant farming in integrated animal husbandry investments).
- All animal husbandry investments except investments in integrated animal husbandry that are incentivized by regional applications or conditionally incentivized animal husbandry investments.
- Milk processing investments below a production capacity of 5 tons/day.

Investment Topics Subject to Specific Conditions for Incentives

- A minimum of 150 animals in bovine integrated milk production investments,
- A minimum of 150 animals in bovine integrated meat production investments,
- A minimum of 150 animals/term in bovine integrated animal husbandry (milk/meat) investments for breeding purposes,
- 100,000 animals/term in poultry integrated investments,
- and 1,000 ovine and caprine per term in integrated milk and meat production investments are required for incentives.

Regional Incentives

Agricultural Sectors in Şanlıurfa Province Incentivized within the Scope of Regional Incentives

REGIONAL INCENTIVES	MINIMUM INVESTMENT TOTAL OR CAPACITY
Integrated animal husbandry investments (including integrated livestock farming for breeding purposes)*	500 Thousand TL
Food products and beverage manufacturing	500 Thousand TL
Aquaculture products (Including juvenile fish and fish eggs)	500 Thousand TL
Cold-storage warehouse services	500 square meters
Licensed warehousing	500 Thousand TL
Greenhouse Farming	5 Decares

(A minimum of 150 animals in bovine integrated dairy production investments, 150 animals in bovine integrated meat production investments, 150 animals/term in bovine integrated animal husbandry (milk/meat) investments for breeding purposes, 100,000 animals/term in poultry integrated investments and 1,000 ovine and caprine per term in integrated milk and meat production investments (including breeding animals) are required to qualify for incentives.

Income Withholding Tax Incentives	None	None	None	None	None	10 Years
Incentives Regarding the Employee's Share of Social Security Premiums (Incentive Duration)	None	None	None	None	None	10 Years

Customs Duty Exemption

Implemented through the exemption of customs duty regarding machinery and equipment imported within the scope of the Investment Incentive Certificate.

VAT Exemption

Implemented through the exemption of value-added tax pertaining to domestic or imported machinery and equipment delivered within the scope of the Investment Incentive Certificate.

Tax Deduction

The discounted implementation of income or corporate tax until the stipulated contribution rate for the investment is reached.

Incentives Regarding the Employer's Share of Social Security Premiums

For a limited amount of time, the Ministry compensates for the employer's share of social security premiums that correspond to the minimum wage required to be paid for the additional employment created within the scope of the Investment Incentive Certificate.

Investment Allotment

Investment allotments may be provided according to procedures and principles determined by the Ministry of Economy for investments with an incentive certificate benefiting from regional incentives.

Financial Interest Incentives

These incentives are implemented as credit scores that can be provided from budgetary resources with the condition of payback in 5 years (depending on the region where the investment will be made), for use in supplying the interest or dividend for term loans taken out of banks for investments. These credit scores can be used to pay for up to 70% of the fixed investment rate recorded in the incentive certificate of said loans, given that they have a term of at least one year.

Incentives Regarding Social Security Premiums (Only Applicable in 6th Region Provinces)

The social security premiums of employees corresponding to the minimum wage required to be paid by the employer to the Social Security Institution (SGK) for the additional employment created by the investment realized through incentive certification, may be allocated from the budget of the Ministry of Economy for 10 years following the completion visa, with the condition that it does not exceed the employment rate recorded in the incentive certificate that the completion visa was drawn up for.

Incentives Regarding Income Withholding Tax (Only Applicable in 6th Region Provinces)

The income tax, calculated through the labor wage corresponding to the minimum wage, can be deducted from the accrued tax on the tax declaration form for 10 years starting from the date of full or partial implementation of the investment, with the condition that it does not exceed the employment rate recorded in the certificate.

INCENTIVES FOR RURAL DEVELOPMENT INVESTMENTS

Implementing Agency: Ministry of Agriculture and Forestry

Agriculture-Based Economic Investments

Scope of the Incentive	New investments regarding the processing, storage and packaging of agricultural products, and investments regarding the capacity increase and technology renewal of currently active or inactive facilities or the completion of partial investments.
Who can Apply	Natural and legal persons
Investment Topics	<ul style="list-style-type: none">• Processing, Storage and Packaging of Agricultural Products• Capacity increase and technology renewal of currently active or inactive facilities regarding processing, storage and packaging of agricultural products,• Construction of new greenhouses that utilize renewable energy resources• Modern fixed investments in agricultural production• Processing, packaging and storage of animal and plant based fertilizer• Establishment of facilities that generate geothermal energy from renewable energy sources; heat and/or electricity from biogas; and facilities that generate electricity from wind and solar energy.• Processing, packaging and storage of aquaculture products
Investment Amount and Incentive Ratio	<p>Net Investment Subject to Grant</p> <ul style="list-style-type: none">• Upper-Lower Limit of Project Amount Subject to Grant: 1,500,000TL - 2,000,000 TL• Grant Ratio : 50%

NOTE: Details regarding this implementation can be found in the "Communique Regarding Agriculture-Based Investment Incentives within the Scope of Rural Development Incentives (Communique Nr: 2017/22)" published in The Official Gazette of Turkey N° 30179, dated 13.09.2017.

INCENTIVES FOR PRIVATE IRRIGATION INVESTMENTS

Scope of the Incentive	Between the dates of 1/1/2018 and 31/12/2020. Includes the procedures and principles regarding the incentives for private irrigation schemes determined to contribute to the economic and social development of rural areas.
Who can Apply	Natural and Legal Persons
Investment Topics	<ul style="list-style-type: none"> • On-farm drip irrigation system setup • On-farm sprinkler irrigation system setup • On-farm micro-sprinkler irrigation system setup • On-farm subsurface drip irrigation system setup • Lineer or Center Pivot irrigation system setup • Hose reel irrigation system setup • Solar powered irrigation system setup
Investment Amount and Incentive Ratio	<ul style="list-style-type: none"> • For Natural and Legal persons : 1,000,000 TL • Grant Ratio : 50%

NOTE 1: Details regarding this implementation can be found in the "Communique Regarding Investment Incentives for Private Irrigation Schemes within the Scope of Rural Development Incentives (Communique Nr: 2017/48)" published in The Official Gazette of Turkey № 30263, dated 07.12.2017.

NOTE 2: Applications within the scope of this communique must be done in the form of a single-copy dossier delivered to the provincial directorate within sixty days of January 1st of the year of implementation, before the end of the work day.
